

# CRYPTO AERO WHOLEFOOD HORSE FEED

Developed with devotion  
for the love of horses!

There is a good reason for  
every ingredient in our feed:

Crypto Aero Wholefood Horse Feed was developed with pure intentions: to heal horses, to give every horse the chance to feel its best for the love of horses. We believe it is the best horse feed available, incomparable to any other existing horse feeds quality! We believe it is so good and nutritious and healthy, it could be used as a supplement by adding small amounts with each feeding to your horses usual diet.

**WHOLE OATS:** Oats have been known to be the safest horse feed for decades. At 12% protein they are a very safe and efficient source of such and the added fiber, from the oat still being in its hull, reduces the glycemic index and again increases chewing. 87% of the starch in oats are digested in the Foregut and only 13% make it to the Hindgut. This is why they are so much safer than Barley and Corn.

**HAY PELLETS:** You don't want starch to make it to the colon, as it is the root of problems like ulcers, colic, laminitis and metabolic diseases. By adding hays to our feed, your horse will eat more slowly so that the feed will stay in the stomach long enough for the starches to be absorbed instead of being passed to the colon. Slowing down the digestion in the stomach also aids in breaking down proteins, so that can be more readily absorbed. Your horse will also chew more, so salivation will be increased. Saliva contains Bicarbonate, which buffers stomach acids. The Timothy and Alfalfa hay pellets also help stabilize the level of acidity in the cecum while the feed is being digested. Research has also shown that adding hay to a grain ration decreases the glycemic index of the feed.

**SHELLED SUNFLOWER SEEDS:** They are an excellent source of highly digestible and palatable oils as well as protein. They will improve your horses hoof growth as well as aide in developing a shiny coat.

**PEAS:** Peas are an excellent source of protein and especially Lysine. While they're still less common in the U.S., many European countries have implemented them into horse feeds. They are very palatable and nutritious.

**RICE BRAN OIL:** Rice Bran Oil is easily digested and the most valuable oil in preventing and treating both stomach and colonic ulcers.

**FLAX SEED MEAL:** High in Omega 3 fatty acids, it improves hoof health, produces shinier coats and supports immunity.

**ROSE HIPS:** Rose hips are the most abundant natural source of vitamin C, which greatly supports the immune system and hoof growth. They have anti-arthritis properties and improve joint health.

**PAPAYA:** Papaya contains papain, an enzyme that increases salivation and appetite, soothes the stomach and makes the intestinal mucosa smooth so that food can pass more easily. Humans have used Papaya for centuries to rid the body of intestinal parasites as well and to relieve stomach upset. Over time Papaya also thickens the intestinal mucosa, making it more resistant to stomach acids and ulcers.

**DRIED GREEN CABBAGE:** Green cabbage contains L-Glutamine naturally. L-Glutamine, a is a potent enzyme supporting both stomach and colon health. It is also considered a superfood due to all the antioxidants and numerous other health benefits it provides.

**SPIRULINA:** This Blue Green Algae, also known as a Super food, contains every essential amino acid and is a potent source of calcium. Spirulina was studied in England and found to cure allergy related Asthma in horses. It's is also famous for regulating digestion. It boosts the immune system and due to its high protein content, is a long acting source of energy and increases vitality. It also contains Iodine which helps maintain proper Thyroid function. Vit B12, lacking in horses with little pasture exposure or low quality pasture, is readily provided by Blue Green Algae.

**BREWERS YEAST:** Brewers yeast supports digestion in making healthy bacteria. It also provides B vitamins and folic acid, key to calm nerves and improved red blood cell growth. Healthy red blood cells are needed for a healthy circulatory system and highly oxygenated organs. The brewers yeast in Crypto Aero Wholefood Horse

Feed is a non-GMO version. To the best of our knowledge, all of our ingredients have been grown from non-GMO seeds, and we strive to use ingredients that are processed as naturally as possible.

**ANISE:** This flavorful seed can be helpful to relieve the pain of indigestion, colic, flatulence and bloating. Since ancient times Anise has been used to loosen phlegm and eases the discomforts of bronchitis, asthma and coughs. It also boosts the immune system.

▶ NO CORN  
▶ NO SOY  
▶ NO MOLASSES  
▶ NO WHEAT  
▶ NO BARLEY  
▶ NO FILLERS  
▶ NO ARTIFICIAL ANYTHING!

.....

Crypto Aero Wholefood Horse Feed has  
crude protein **13.50%**,  
crude fat **11.00%**,  
crude fiber **14.00%**

**FENUGREEK:** Fenugreek improves digestion, reduces inflammation, lowers blood glucose levels (making it good for diabetic conditions), soothes and heals the intestinal tract and has cardiovascular benefits.

**Feeding directions:** As always when changing feeds, replace your horse's diet gradually over one to two weeks. Since there are no fillers in Crypto Aero Wholefood Horse Feed, and every ingredient enables maximum absorption, you may feed approximately one third less than on any other feed. You may feed wet or dry, depending on your horses needs. Feed only as much as your Horse needs to maintain a healthy weight and to meet energy requirements. Never feed any horse feed that is moldy and /or contains insects as it may cause serious illness and/ or death.

You should always offer your horse free choice minerals and supply high quality forage.

FEEDING DIRECTIONS: Feed Crypto Aero Wholefood Horse Feed per day per LB. Fresh clean water should be available free-choice at all times. Minerals and Salt should be available free-choice at all times. Hay should be fed to every horse at a rate of 1%-2% of body weight.

WEIGHT (LB)	MAINTENANCE	LIGHT WORK	PERFORMANCE
600-800	0.5-1	1-2	2-3
800-1000	1-2	2-3	2-4
> 1000	1-3	2-4	3-6

Adjust amount fed per body condition and energy requirements of your horse. Never feed more than 5 lbs in any single feeding. May be fed wet or dry. Store in a cool & dry area free of insects and rodents. Do not allow animals to have access to rodent or insect infested feedstuff, or feedstuff that is moldy. Make feeding changes gradually over a 1-2 week period. Consult with a qualified veterinarian if problems or questions arise.
